PROBLEM

1 Lower user engagement with scheduled exercise.

2 Complexity in scheduling and managing exercise.

3 Unavailable Youtube Links for workouts

SOLUTION

Personalized Reminders

1

Simplify the Interface.

2

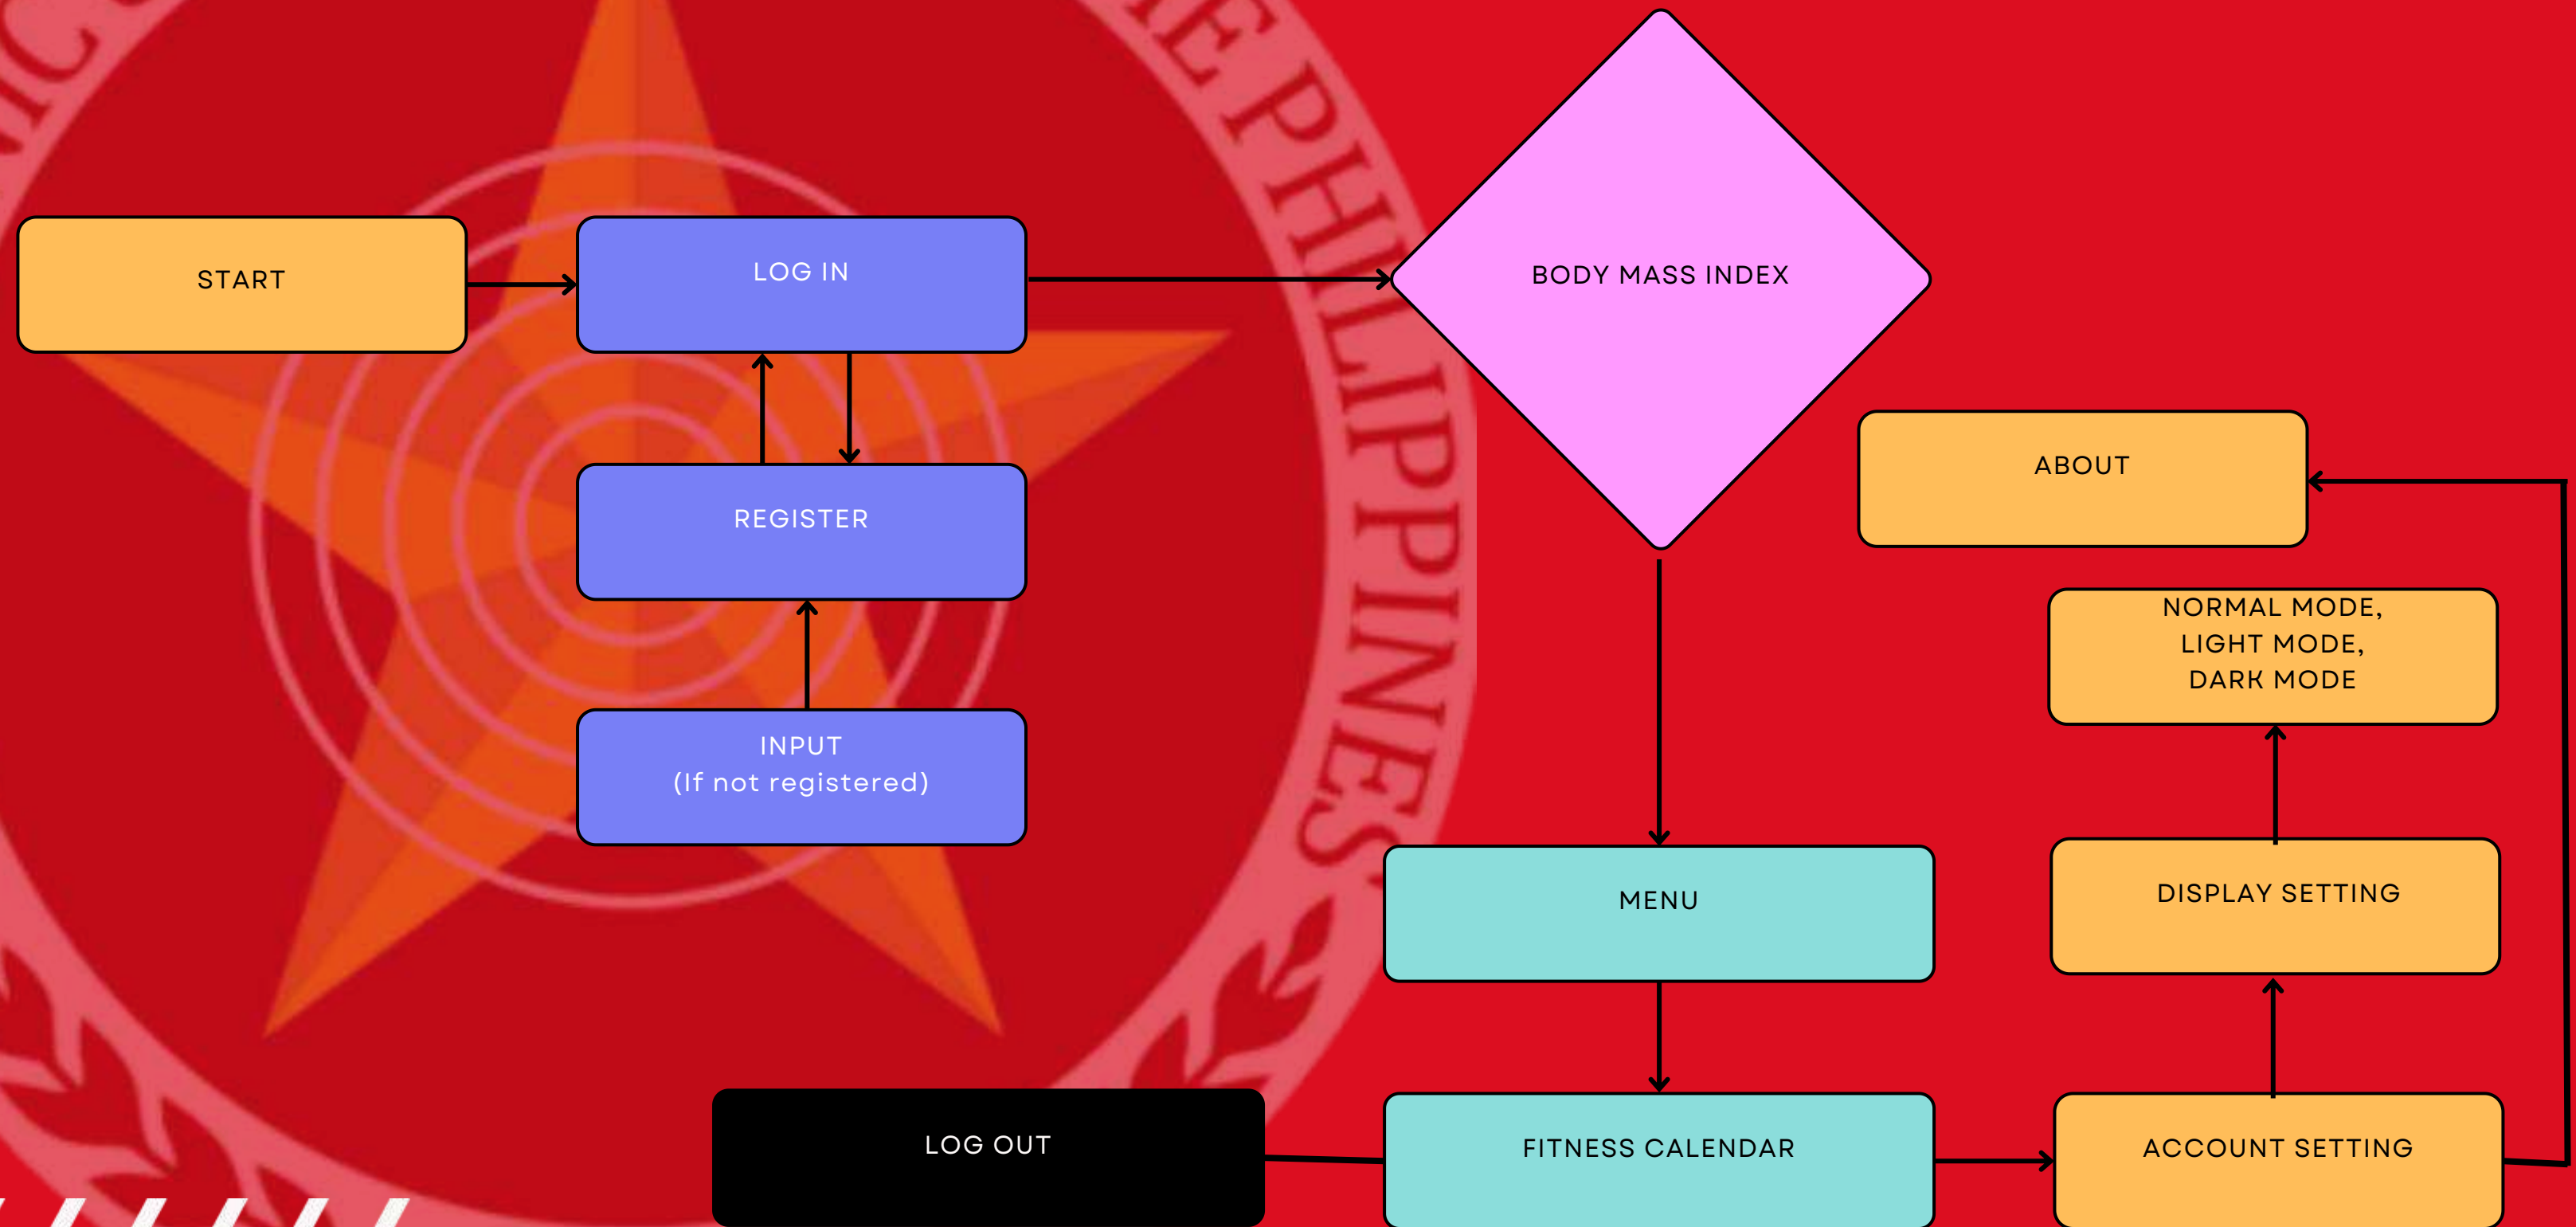

Back-up Links

3

OVERVIEW OF THE SYSTEM

SYSTEM FLOW CHART

EPIC/USER STORIES WITH ACCEPTANCE CRITERIA

 FLOPPY DISK

As a student...

Logging In

- I want to register using my PUP credentials (webmail)
- So that my account is securely linked to the university system.

- The user must be able to register using their PUP credentials(webmail)
- The system validates credentials against the university database

Calendar Usage

- I want to explore the calendar layout and see a clear representation of the dates and scheduled exercises.
- So that I can understand how to organize and plan my fitness activities.

- I want to explore the calendar layout and see a clear representation of the dates and scheduled exercises
- A modal or form appears upon selecting a date, allowing the user to input exercise type, duration, and time.

Website Experience

- I want to feel that the website is user-friendly, engaging, and tailored to my fitness needs.
- So that I am encouraged to return and continue using the platform.

- The user must be able to navigate the website easily and complete basic tasks.
- Any faulty functions and suggestions should be head and cared for the sake of the users
